

## DESCRIPTION

Durable and washable cloth face mask to give you extra safety.

Cloth face mask can be used for example instead of scarf and can give extra protection for allergic persons against street dust and pollen.

Use cloth mask when visiting stores and pharmacies and wash after every time you use it. Do not touch the mask when wearing it!

This cloth mask is 90% polyester/10% cotton and it can be washed in 60 degrees. We cannot guarantee that colours do not fade over time.

PLEASE NOTE! Cloth mask does not prevent you from catching the virus, but to some degree it can prevent the spreading of the virus. This will to some degree protect the people near you from droplet infection in case that you are a symptomless carrier of the virus.

### Instructions:

- Wash the mask before using it for the first time
- Wash hands before placing the mask on your face
- Dress up the mask by grabbing the ear loops
- Make sure that you can breathe properly when wearing the mask
- Heart- and cardiovascular disease, asthma or chronic obstructive pulmonary disease may prevent you from wearing a cloth mask
- Keep the mask clean when using it, do not touch it
- Please note that if the mask gets wet the microbes will penetrate it more easily (recommended to use max for 1 hour)
- Undress the mask by grabbing only the ear loops and put it straight into a washing machine or plastic bag
- Wash the mask in 60 degrees

### Other important notifications of the cloth mask:

- This mask is not for professional use!
- Remember that a cloth mask is not a personal protective equipment (PPE).
- Cloth mask does not prevent you from catching the virus
- A dirty mask might spread the virus.
- Using mask in public transport or in shops might prevent you from spreading the virus if you are a symptomless carrier.
- There are more cons than pros if the cloth mask is not used properly
- Please note that this cloth mask is not an official personal protective equipment (PPE), a respirator, such as N95, FFP2, or the equivalent or a surgical mask.
- The face mask is a preventive measure, and its primary use is to help stop the spread of the coronavirus. It does not prevent you from catching the virus totally.

**Material:** 90 % polyester / 10 % cotton
