FESTIVAL PRODUCTS

All of the products absolutely necessary to get your event going!

ECO WRISTBANDS

Eco wristbands are our own product line made of recycled and renewable materials only. All of the eco products are manufactured from environmentally friendly materials, either biodegradable renewable plant based fibers or recycled plastics. Choosing to use Eco wristbands at your next event helps to save the environment and for you as the promoter, it is a small step towards becoming a greener event.

RECYCLED OCEAN PLASTIC **WRISTBANDS**

Ocean-plastic wristbands with dye-sublimation printing combine vibrant, full-colour design with real environmental impact. Made from recycled ocean-bound plastics, these wristbands help reduce plastic debris before it reaches the sea, supporting cleaner oceans and healthier marine life. Using advanced dye-sublimation printing, inks are permanently infused into the material, delivering long-lasting colour, sharp detail, and excellent resistance to wear — even in demanding festival environments.

Every wristband contributes to protecting sea life by giving discarded plastic a second life, reducing pollution, and supporting circular material systems.

A sustainable choice that delivers high visual impact, durability, and a clear environmental message — without compromise.

RECYCLED OCEAN POLYESTER

*Available sizes:
15 mm x 350 mm, for custom sizes please enquire*

Full color digital printing

ECO WRISTBANDS

RECYCLED **POLYESTER** WRISTBANDS

High quality post-consumer recycled polyester used on these woven wristbands is soft and durable finally enabling the manufacture of the traditional festival wristband with sustainable materials! Materials are certified according to GRS (Global Recycled Standard) 4.0 standard, wristbands can be woven with 18 different stock yarn colors and for larger production quantities with yarns dyed to the requested pantone colors.

GRS CERTIFIED POLYESTER

SINGLE USE CLOSURE

*Available sizes:
15 x 350mm, 20 x 350mm, length of the ribbon can
be adjusted*

RPET **WRISTBANDS**

RPET wristband is soft, visible, durable & ecofriendly choice for your event! Digitally printed or screen printed - whole wristband can be personalized - on both sides!

We have two different sources for the RPET material: digitally printable ribbon is made from recycled polyester fabrics and screen printable one from recycled plastic bottles. Either or, you cannot go wrong with this one!

RECYCLED PET WRISTBAND

*Available sizes:
15 mm x 350 mm, for custom sizes please enquire*

Any pantone-color possible

ECO WRISTBANDS

BAMBOO WRISTBANDS

In addition to being comfortable and having a luxurious feel to it, Bamboo is an eco-friendly choice for your wristbands. Combined with a wooden smart tag, you can have a completely plastic-free smart wristband with full RFID capabilities.

Bamboo is a sustainable resource, so it helps to reduce the carbon footprint of your event. The bamboo yarn used in our wristbands is prepared thru a biological and mechanical process, and no harmful chemicals are used in its production. Like cotton, it is hypoallergenic and won't irritate sensitive skin or cause allergies.

HEMP+ORGANIC COTTON WRISTBANDS

We chose to improve our hemp wristbands even further!

Adding organic cotton makes the wristband easier to produce, resulting in more favourable pricing. Organic cotton makes the wristband a little softer, making it more comfortable to wear. Using hemp & organic cotton combo means approximately 80% less CO2 emissions compared to polyester and in an ideal environment, fiber decomposes in mere 6 months as opposed to 100s of years for synthetic fibers.

It is also worth mentioning that cotton and organic cotton are two different things, organic cotton production uses only 10% of the amount of water required for standard cotton, making organic cotton a significantly better choice for the environment.

*Available sizes:
15 mm x 350 mm, 20 mm x 350 mm, for custom
sizes please enquire*

Silk screening with 1-4 colors

*Available sizes:

LED WRISTBANDS

LED wristbands are a great addition to any event: use them for brand activation at trade fairs or an extra element at a stadium concert or a club show and make your audience as a part of your light show!

REMOTE CONTROLLED WRISTBANDS

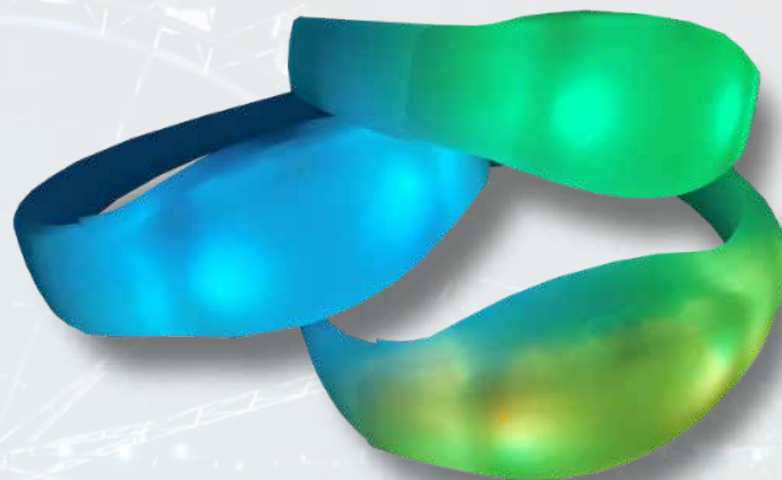

The remote controlled LED bracelet works with various types of remote controllers, each suitable to a specific event size with ranges from 400 meters to a whopping 1200m +. LED wristbands create a stunning light show at live events, making the audience part of the show. The bracelets work by creating multiple flash patterns with RGB color changing LEDs which can be programmed into different groups and obviously, a huge number of colors.

MOTION ACTIVATED WRISTBANDS

Motion Activated – The motion activated LED bracelet lights up when you dance, dance, dance... another super addition to clubs, concerts, carnivals and other activities. Add your logo on the band and your brand literally is set in motion! Your text or logo can be printed on the plastic part of the wristbands.

SOUND ACTIVATED WRISTBANDS

Sound Activated – see the music! This sound activated wristband is available in various colors and once activated (button or a tear-off token) the wristband lights up with music. Super addition to clubs, concerts, carnivals and other nighttime events and activities. Add your logo on the band and your brand literally lights up!

Material: ABS + Silicone

Product Size: 7 cm x 6.5 cm x 2.5 cm

Logo Size: 1.8 cm x 3.0 cm

Any Pantone color possible

Led Colors: 15 Multi colors

Certificates: CE & ROHS

LED WRISTBANDS

BLUETOOTH CONTROLLED **WRISTBANDS**

Remote controlled LED bracelets that can be controlled with a mobile app on a phone or an iPad. All the features and functionalities and of the standard remote controlled wristbands, with a more user-friendly interface.

ID CARDS

PVC CARDS

Durable and high quality cards for payment, access control and membership purposes.

Any size and shape possible

Can be made with matte, metal sparkle or transparent finish - ask for more options!

Full color print both sides

Options: signature panel, barcoding, embossing, debossing, magnetic stripe, gold or silver foiling, variable data, hole punching etc.

PETG CARDS

PETG is a more ecological choice for your plastic card needs. Material can be recycled as a part of commonly available plastic recycling programs and is as durable and high quality as traditional PVC. We make cards for payment, access control and membership purposes. Any size and shape possible!

Any size and shape possible

Can be made with matte, metal sparkle or transparent finish - ask for more options!

Full color print both sides

Options: signature panel, barcoding, embossing, debossing, magnetic stripe, gold or silver foiling, variable data, hole punching etc.

ID CARDS

CARDBOARD **CARDS**

Coated cardboard cards are a durable alternative for plastic cards and offer great value for many applications!

Ask us about size options!

Printing: 4/4, 4/0, full color print

Material: Invercote Creato Matt 350 gr

Options: barcode, QR-code, variable data, hole punching, rounded corners, lamination, ask for others

ADHESIVE SATIN **BADGES**

Self-adhesive badges are made of textile. The back of the badge is actually a sticker so that you can easily stick the badge on to your clothes. This is a perfect alternative for identifying touring personnel and local staff! Satin badges can be written on with a permanent marker.

2 standard sizes: 100 x 80 mm and 100 x 140 mm

Ask us about other size options!

LANYARDS

OCEAN BOUND POLYESTER **LANYARDS**

Ocean-plastic lanyards with dye-sublimation printing combine bold, full-colour branding with genuine environmental responsibility. Manufactured from recycled ocean-bound plastics, these lanyards help prevent plastic waste from entering the ocean, supporting cleaner seas and protecting marine life.

Advanced dye-sublimation printing ensures vibrant colours, fine detail, and long-lasting durability, even with constant daily use at festivals and events. By repurposing ocean-bound plastic, each lanyard actively contributes to reducing plastic pollution, promoting circular materials, and helping preserve ocean ecosystems.

A sustainable lanyard solution that delivers maximum visual impact, proven durability, and real-world environmental benefits.

All closures and attachments are available for OBP - ask for corn starch quick release and hook aswell!materials, Standard sizes 15 x 900mm and 20 x 900mm, enquire for custom lengths and width!

LANYARDS

ECO LANYARDS

Lanyards can be made of all eco-friendly materials we offer for wristbands! You can choose from **basic** or **premium recycled PET**, luxuriously soft **bamboo**, traditional cotton, or our newest and eco-friendliest fabric, **hemp+cotton blend**.

All closures and attachments are available for these materials, as well as custom lengths and widths

*Materials in the picture from left to right:
1. Cotton - 2. Bamboo*

WOVEN LANYARDS

When only the best is good enough, your choice is this cool yet comfortable woven polyester lanyard! Your logo is embroidered directly to the lanyard, which makes it extremely durable. This lanyard has texture and character.

*All lengths / widths are possible
Standard length: 90 cm*

Woven polyester with 1-8 simultaneous colors

LANYARDS

SCREEN PRINTED LANYARDS

The perfect choice for a basic text design or any basic logo with simple colors.

High quality silk screen printing with 1 to 8 colors

Basic length: 90cm

FULL-COLOR PRINTED LANYARDS

When you want high quality graphics or complex logos, full-color print is your pick numero uno. Perfect choice for everyday use.

Dye sublimation printing in full color

Standard width: 1 cm, 1,2 cm, 1,5 cm, 2 cm or 2,5 cm

Standard length: 90cm

LANYARDS

FESTIVAL GUIDE **LANYARDS**

When event memorabilia meets functionality, with a touch of Nordic sustainability, you get the Festival Guide Lanyard.

Designed to be worn, used, and kept, this smart event essential puts your entire programme right around your visitors' necks. Show times, maps, key information, and branding are always within easy reach: no paper programmes, no endless scrolling through festival apps.

The Festival Guide Lanyard doubles as a memorable keepsake that aligns perfectly with your visual identity, while helping reduce waste and streamline information sharing on-site. It's faster to check, easier to use, and far more sustainable than traditional printed guides.

Go bold, go creative:

and turn a practical necessity into a fan-favourite, eco-conscious festival essential.

Standard configuration includes:

*100 × 70 mm cardboard badge, laminated on both sides
full-colour printed front and back with your design
20 × 900 mm lanyard, made with certified recycled polyester
and printed in full colour with your branding*

SAMPLE CONTENT OF THE GUIDE

*On-stage schedules and set times

WOODEN PRODUCTS

Our wooden products are all made of The Forest Stewardship Council – FSC – certified materials. FSC promotes environmentally appropriate, socially beneficial, and economically viable forest management all over the world. FSC's vision is that the world's forests meet the social, ecological, and economic rights and needs of the present generations without compromising those of future generations.

Available wood types for all products:
sapele, maple, oak, beech, bamboo,
basswood and cherry

KEYFOBS

Keyfobs, placeholders or hangtags is another example of a product that usually is made of plastics! We can make these of sapele, maple, oak, beech, bamboo, basswood and cherry, and personalize them to your liking!

CARDS

A perfect way to help to minimize the million tons of PVC sent to landfills each year is to use Wooden cards!

These high quality ecological products are certain to make an impression - they are different, unique and simply put - beautiful pieces of art!

Cards made out of cork are also available. Cork cards are made with basswood inner layer for added strength.

Available in standard sizes or fully customized to your requirements

Full color printed either offset or inkjet, engraved, lasered or a combination of these!

Available with variable data like QR and barcodes or consecutive numbering

Available in standard sizes or fully customized to your requirements

Full color printed either offset or inkjet, engraved, lasered or a combination of these!

Options include variable data like QR codes, consecutive numbering, signature panel-magnetic stripe, either HiCo or LoCo

CHARITY RIBBONS

SUSTAINABLE **CHARITY RIBBONS**

Charity ribbons made with sustainable materials offer a meaningful way to raise awareness while reducing environmental impact.

Available in recycled polyester, ocean-bound polyester, or natural alternatives such as hemp or bamboo, these ribbons combine responsible sourcing with high-quality finish and durability.

Designed for comfort and everyday wear, each ribbon can be fully customised in colour, print, or weave to match your campaign.

Even the safety pins are fully customisable, allowing for branded finishes that reinforce your message down to the smallest detail.

A thoughtful, eco-conscious choice that supports both important causes and a more sustainable future — without compromise on quality or visibility.

*Fully customisable printing on one or both sides
Fully customisable safety pins (colour and style)
Custom packaging options available
Order fulfilment services available*

OTHER PRODUCTS

CRAFT PAPER AND BAMBOO **HAND FANS**

Bamboo and craft paper hand fans offer a stylish, low-impact way to keep cool at festivals and outdoor events.

Made with a natural bamboo frame and lightweight craft paper print surface, these fans combine traditional craftsmanship with modern graphic appeal. The durable bamboo ribs provide strength and longevity, while the smooth paper finish allows for bold, high-quality printed designs that stand out in crowds and on social media.

Lightweight, foldable, and easy to distribute, these fans are a practical alternative to plastic giveaways — reusable, recyclable, and designed with sustainability in mind.

A functional promotional item that delivers comfort, visual impact, and a clear eco-conscious message.

*Fully customised printing on one or both sides
Laser-printed bamboo handle available
Custom packaging options available
Low minimum order quantity — from just 100 pcs*

OTHER PRODUCTS

POPSOCKET

The popular grip tool for a mobile phone can now be customized! A perfect and popular giveaway at trade fairs is guaranteed to keep your brand visible for a long time. Low minimum order and a cost-effective pricing.

Material: ABS

Diameter: 3,9 cm

Any Pantone Solid Coated color available

Printing method: Digital print

Popsocket colors: black or white

MINIFAN

Feeling hot? Hot festival summer is ahead of us, why not giveaway or add to your event merchandise powerful minifans? Your message can be shown on the fan blades when the fan is turned on by different colored Leds, definitely making an impression. In addition to the LED message, fan body can be printed. Powered by 3 AAA batteries, the minifan provides long-lasting relief and fun with little money.

Material: Hand-ABS; Blade-PVC

Size: 11 x 3.5 x 5.5 cm

Fan color: Red, Yellow, Blue, Green, White

Led message colors: Red, Yellow, Blue, Green, White

Led message: 6 group messages, 22 letters for each

Certificates: CE, ROHS, REACH, FCC

RFID PRODUCTS

RFID-wristbands bring more value to the wristband. RFID wristbands can be used to track client behaviour, for cashless transactions and to build a detailed database of entry and exit times and crowd peaks at the event. RFID-wristbands come in various forms, from multiuse watch like wristbands to our Premium band range with full color imprint. We can also provide you the hardware and software solutions together with our partners.

RFID WRISTBANDS

WOVEN RFID WRISTBANDS

This is the original festival wristband – made woven from polyester yarns of different colors. The wristband is soft, visible and durable and often worn days, weeks or even months after the event.

Woven wristband is now available with recycled materials as well, please check with your representative.

Wristband tag, or a "saddle" can be made of different materials and even in custom shape and of course, any available smart chip can be used which means our smart products work with any backend solution.

Ribbon size: 15 x 350mm or 20 x 350mm

Personalization ribbon: depending on your selection of the ribbon material

Personalization RFID tag: full color printed

Closure mechanism: selectable from our closure options

Inlay: All common inlays usable, HF / UHF / LF

Other options: QR-code, numbering, UID-print, glitter/glow yarns, encoding, custom shaped RFID tags

DYE SUBLIMATION PRINTED RFID WRISTBANDS

For more complex artwork or photographic images, dye sublimation is the best choice. Soft, visible, durable. Whole wristband can be personalized - on both sides.

Wristband tag, or a "saddle" can be made of different materials and even in custom shape and of course, any available smart chip can be used which means our smart products work with any backend solution.

Ribbon size: 15 x 350mm or 20 x 350mm

Personalization RFID tag: full color printed

Closure mechanism: selectable from our closure options

Inlay: All common inlays usable, HF / UHF / LF

Other options: QR-code, numbering, UID-print, glitter/glow yarns, encoding, custom shaped RFID tags

RFID WRISTBANDS

STRETCH WRISTBANDS

This re-usable and soft RFID wristband is extremely handy without losing its stylish appearance. Fabric wristband is soft and light but durable - perfect for sporting events for example!

The wristband can be entirely personalized with any print in any Pantone color

EMBEDDED RFID WRISTBANDS

These fabric wristbands are provided with a chip sandwiched between layers of fabric. Because of this production method the bands are extremely fast to make and since we use an encased RFID inlay instead of a plain antenna, the wristband is reliable aswell.

Sizes: 15 x 350mm, 20 x 350mm or custom

Personalization: digitally printed ribbon with a woven badge to embed a sturdy RFID inlay

Closures: all regular closures available

Options: metallic and UV-yarns, chip encoding, UID and serial print

PREMIUM RFID WRISTBANDS

These premium RFID wristbands are made of PP plastic and are extremely durable.

Sizes: standard 25 x 255mm or custom

Personalization: digital full color print

Inlays: all the most common RFID/NFC chips available

Other options: microtext, underside print, barcodes, UID, QR-codes

Finish: lamination or varnishing

RFID **WRISTBANDS**

SILICONE RFID **WRISTBANDS**

RFID/NFC silicone wristband that is adjustable to any wrist.

Durable and waterproof, with a sleek design that is unobtrusive and comfortable on the wrist, thus perfect for any active outing, or even athletes at sporting events!

Different styles available

Available with most HF inlays, optional UID print and chip encoding

LEATHER RFID **WRISTBANDS**

Custom leather RFID wristband is a true VIP product! We make these from various different materials, including high quality faux leather. Make your visitors feel truly special with this unique piece of (almost) jewellery!

Any size and shape

Available in any pantone color (tag, belt)

Any design: designable with different attached objects, printing methods, laser cutting, hole punching etc.

RFID CARDS

WOODEN RFID CARDS

All the functionalities of a smart card are now available in a wooden card, too! Stand apart from the plastic crowd with an environmentally conscious solution that has a distinctly natural look and feel. We can make wooden cards in various shapes and sizes.

Any size possible, personalization by offset printing or laser etching

Available with most RFID and NFC chips

Options: signature panel, magnetic stripe, barcoding, Qr-coding, consecutive numbering, hole punching etc.

Wood types: sapele, maple, oak, beech, bamboo, basswood and cherry.

All of our wood comes from sustainable forests certified by Forest Stewardship Council - FSC Website

PVC RFID CARDS

PVC RFID cards are available in tens of different stock sizes and can be made with any chip configuration and encoding according to your needs. We annually offset our CO2 emissions that originate from manufacturing of our plastic products.

Any size and shape possible

Can be made with matte, metal sparkle or transparent finish - ask for more options!

Full color print both sides

Material: PVC

Options: signature panel, barcoding, embossing, debossing, magnetic stripe, gold or silver foiling, variable data, hole punching etc.

PETG RFID CARDS

PETG is a more environmental option to the traditional PVC because it is easier to recycle. RFID cards are available in tens of different stock sizes and can be made with any chip configuration and encoding according to your needs. We annually offset our CO2 emissions that originate from manufacturing of our plastic products.

Any size and shape possible

Can be made with matte, metal sparkle or transparent finish - ask for more options!

Full color print both sides

Material: PETG

Options: signature panel, barcoding, embossing, debossing, magnetic stripe, gold or silver foiling, variable data, hole punching etc.

RFID **CARDS**

WOOD PULP **CARDS**

Plastic-free NFC cards made from wood pulp offer a sustainable alternative to traditional PVC cards — without compromising performance or design.

Manufactured from responsibly sourced wood pulp and printed using conductive silver ink, these cards deliver reliable NFC functionality in a fully plastic-free format.

Designed to be practically compostable at end of life, they support circular material use while significantly reducing plastic waste.

Lightweight, durable, and fully customisable, wood-pulp NFC cards are ideal for events, access control, and brand experiences that prioritise sustainability and innovation.

A future-ready solution that combines technology, performance and environmental responsibility in one card.

Compatible with most NFC and HF chips

Any size available upon request

Variable data personalisation possible

Perforation options available

Magnetic stripe option available

RFID TAGS

All the most common chip types are available. Chips and tags are compatible with most of the wristband types. Contact us for more information!

WOODEN TAGS

An environmentally friendly solution for your RFID/NFC wristbands. Waterproof and durable just like our plastic tags. Combine this with a bamboo or an RPET wristband for a reduced carbon footprint.

The tags can be laser printed, silkscreen printed with a solid color, or even offset printed with full colors

Available wood types: sapele, maple, oak, beech, bamboo, basswood and cherry

COCONUT SHELL TAGS

Our evergrowing range of ecoline products just got a proper boost - RFID tags made of coconut shells!

This truly organic material is very strong, literally impossible to be broken in normal use and can be provided with any RFID or NFC chip on the market.

By nature, the shells are little curved, so the tags repeat this natural curvature making the tag sit nicely on a wristband.

Inlay: any HF inlay

Materials: available with all fabric material options, 15mm or 20mm width

Closure: available with all closure choices subject to wristband material

Design: lasered design

Other options: UID, serial numbering

RFID TAGS

Combine these with any fabrics material available for a quality RFID wristband.

All the most common chip types are available. Chips and tags are compatible with most of the wristband types. Contact us for more information!

PVC TAGS

PVC tags are the most common smart technology carrier on festival wristbands. We have mastered production, quality control and speed by providing these to events globally for nearly ten years now, so it is safe to say you can count on us!

PETG TAGS

PET-G tags look and feel like regular PVC tags, with the added benefit of being recyclable. We've added lettering on the back of the tags to remind users that the material used is PET-G and can be recycled with other plastics.

CUSTOM TAGS

Both PVC and PETG also available in various shapes including your own shape and size.

ABOUT US

Nordic Wristbands is one of Europe's leading manufacturers of event access control products. Alongside a wide range of access control solutions, we take pride in designing and producing our own RFID / NFC inlays, optimising performance and product reliability to meet the specific demands of the event industry.

We are globally recognised for our extensive range of sustainable and ecological materials. We genuinely care about the planet and are constantly seeking better, more responsible alternatives to replace unnecessary virgin plastics. Did you know that more than 20 million single-use virgin plastic wristbands are used every summer?

We are also known for our reliable service and fast turnaround times. Being a small company is an advantage — it allows us to stay agile, responsive, and flexible.

And finally, we've been here since 1995.

Some might call that experience.
